Dear Joe,

As you've probably heard, the FBI is a much abused agency.

The enclosed record reflects the fact that really important matters did receive the highest level attention.

And promptly, too.

When you wrote from a one-lunger 1/9/67 there was a response on 1/11/67.

There was only Clyde Tolson between Cartha DeLoach and Hoover then.

Alex Rosen was Assistant Director in charge of the General Investigative Division.

J.M. Malley was an Inspector, on the JFK case.

All paid attention. Look at all the initials.

Two copies were sent to the Baltimore Field Office, it was that important for it to know. (I live within its turf, not you.)

But they had Philadelphia tape the show!

62-109090-563 means that within the file on the Warren Commission this was Serial Number 563.

You made it!

Best wishes,
